URN (Office Use)	
-------------------	--

Objective	To inform parents about phonics so they could help their children with reading.
Sub Objective	To build up a number of parents who have been trained in phonics so that they could help in school.
Objective Detail	
What We Did	Parents of pupils from nursery to Year 3 were invited to school to see phonics being taught in each classroom. This 'phonics in action' tour lasted 1 hour. Afterwards, teachers/nursery nurses gave a short presentation on each phase. They answered questions. A crèche was available so as to include all parents. A week later the same was repeated in Polish to our Polish parents.
How Well It Worked	29 parents attended with 15 Polish parents attending. The sessions were done really well by our teachers/nursery nurses/teaching assistants. The parents enjoyed watching the live lessons and saw the development from phase 1 to phase 6. Any points of clarification was done in the follow up presentation.
Benefits We See	Parents are more confident in helping their children. They have been seen 'sounding out' signs as they walk in the street. They feel more informed about the language used in phonics. They understand and trust how we do things and relationships at home have been strengthened through reading together.

School / Organisation	St. Margaret of Scotland Primary School
