URN (Office Use )	
-------------------	--

Objective	To enable children to feel safe on the roads
Sub Objective	To give children the skills needed to cross the road and be safe near cars
Objective Detail	Children to work on safety issues within a small group with parental support
What We Did	<p>Road Safety is seen as important in school as several children cross small roads alone when playing after school.</p> <p>The school runs the Kerbcraft scheme in school to help children to develop an awareness of danger near roads. A member of Norfolk County Council Road Safety Team comes in to school to run the scheme which involves looking at cars and going out to practice crossing roads with an adult. As there is a high ratio of adults to children parents are invited to work with the children.</p> <p>Children in the Foundation Stage have a visit from a member of the Road Safety Team about using a car seat and holding an adults hand near cars. They are also given a certificate and stickers to take home.</p> <p>All parents are sent information about crossing the road to talk about at home and all children in school receive reflective stickers and reflectors to hang on bags and coats.</p>
How Well It Worked	<p>All children in school enjoy receiving the reflectors and most parents support their children in wearing these during the autumn and winter. Children are able to talk about the dangers around roads although there are still a few children who are seen crossing roads alone.</p> <p>Those children who help with the Kerbcraft scheme understand the importance of children being safe near roads. The majority of parents with Foundation Stage children ensure that their child holds hands to be safe near roads. Some will ask a staff member to reinforce safety issues with their child when leaving school.</p>
Benefits We See	<ul style="list-style-type: none"> <li>- Children know the rules about keeping safe near cars</li> <li>- Parents have information to share with their child</li> <li>- Children have reflectors to use</li> </ul>
